

Titanium Diboride Powder

HCT-30 and HCT-F

Titanium Diboride (TiB₂) is produced by Momentive Performance Materials using a continuous chemical process that controls stoichiometry and particle size to create high purity powder.

Potential Applications

- Electrically conductive composites such as aluminum evaporation boats
- Complex, sinterable TiB₂ shapes
- Additives for producing specialty ceramic composite materials
- Refractory material and antioxidant additive that is nonreactive to most molten nonferrous metals and alloys
- Thermal management materials

Key Features & Typical Benefits

Extreme Hardness

Nearly as hard as diamond when sintered, TiB₂ is tough enough to be considered for use in military armor and may improve the fracture toughness of ceramic cutting tools and other components.

Electrical/Thermal Conductivity

As an excellent conductor of both electricity and heat, TiB₂ may be valuable in electronic and specialty applications. TiB₂ enhances thermal conductivity when used as a filler in polymeric matrices.

Chemical Resistance

Titanium Diboride will not react with molten, nonferrous metals including Cu, Zn and Al. TiB₂ is used as crucibles, vacuum metallization components and electrodes for processing these materials.

PATENT STATUS: Nothing contained herein shall be construed to imply the nonexistence of any relevant patents or to constitute the permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of the patent.

PRODUCT SAFETY, HANDLING AND STORAGE: Customers considering the use of this product should review the latest Material Safety Data Sheet and label for product safety information, handling instructions, personal protective equipment if necessary, and any special storage conditions required. Material Safety Data Sheets are available at www.momentive.com or, upon request, from any Momentive Performance Materials representative. Use of other materials in conjunction with Momentive Performance Materials products (for example, primers) may require additional precautions. Please review and follow the safety information provided by the manufacturer of such other materials.

LIMITATIONS: Customers must evaluate Momentive Performance Materials products and make their own determination as to fitness of use in their particular applications.=

EMERGENCY SERVICE:

Momentive Performance Materials maintains an around-the-clock emergency service for its products.
